### **EXAMINER'S AMENDMENT**

The applicant filed a clean version and a marked up version of a substitute specification on 2/23/05 and 2/22/05 respectively. The substitute specification is in compliance with 37 CFR 1.125(b) and has been entered. It is noted that the new substitute specification was prepared using a different font than the original specification, which resulted in fewer pages than the original specification. However, a close examination of the substitute specification finds that it is complete and contains no new matter. It is further noted that the disclosure present in original pages 135-140, which were missing from the application as filed, and objected to in the previous office action, can now be found in pages 107-112 of the new substitute specification.

As indicated in the previous office action mailed on 12/20/04, claims 57, 59-61, 64, 66-68, 71, and 78-82 are allowable.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jeffrey Pepe on 5/9/05.

Art Unit: 1632

1. On page 107 of the substitute specification filed on 2/23/05, in Table 1, after the heading "Sequence of vector pGPe", the phrase -- (SEQ ID NO:72) -- has been added.
